

Chapter 70: THE GREAT ADVENTURE OF USOPP THE MAN

UNLIKE THE INFAMOUS SWASTIKA OF NAZI GERMANY, THE BUDDHIST MANJI IS DEPICTED AS A SQUARE (RATHER THAN DIAMOND-SHAPE), AND CAN POINT EITHER CLOCKWISE OR COUNTER-CLOCKWISE. AN ANCIENT SYMBOL, THE MANJI CAN BE SEEN ON THE CHEST, PALMS AND FEET OF BUDDHA, REPRESENTING GOOD LUCK. YOU'LL ALSO SEE IT ON THE BELLY OF THE FISHY BAD-BOY BELOW. ↴

Q: What does the D in Monkey D. Luffy stand for? Is it Donburi (a bowl of rice with topping)? Daibutsu (a statue of the Great Buddha)? What?! I gotta know!!

A: I get this question all the time.
But I can't answer it...yet. For now, don't worry about it. Just read it as "D."

Q: What's the relationship between pirates and rum?
In books, pirates and rum are inseparable.

A: Not just pirates and rum, But all seafarers and rum.
The short story is that rum was cheap, so the British navy in pirate times switched from Brandy to rum for the sailors' Grog rations, which led to hard-drinking mariners being associated with rum. By the way, the reason there was so much alcohol aboard the ships was that on long sea voyages, water would go bad.

Q: The other night, I met an inhabitant of the planet Gum-Gum. I asked him how long his arms stretched, and he said, "705 Poison Gum-Gums." How long is 705 Poison Gum-Gums?

A: You met a Gum-Gummian!! Amazing!! And lucky!! A "Poison Gum-Gum" is a unit equal to ten Gum-Gums. So that's 7,050 Gum-Gums!! We're talking cosmic distances!! But be warned--of all the races in the universe, the Gum-Gummians are the most likely to say ridiculous things.
